ARTCRAFT FLEET TECHNICAL BROCHURE · SERIES #28

FormCraft v0.1.0

Survey, feedback response, and NPS analytics studio as a pure-Rust local-first craft app.

v0.1.0	4 Crates	1387	6-Gate
RELEASE VERSION	WORKSPACE TIERS	PURE-RUST LOC	ARTCRAFT VERIFIED

Repository: `D:\Dev\repos\formcraft` · **Standard:** `CRAFT_BROCHURE_STANDARD.md` · **Compiled via:** `BookCraft v0.5.0`

Survey, feedback response, and NPS analytics studio as a pure-Rust local-first craft app.

Part of the back-office craft suite (plan: `mcp-central-docs/projects/craft-fleet-expansion/BACKOFFICE_CRAFT_SUITE.md`).

Replaces Typeform, Google Forms, and Qualtrics for small teams.

Surfaces

- **L1** `formcraft-core` & `formcraft-store`: Form JSON schema validation, SQLite WAL response persistence, DE/EN sentiment estimation, and detractor routing to `gaincraft`.
- **L2** `formcraft-mcp`: Unified CLI (`formcraft define`, `formcraft nps`) and stdio JSON-RPC MCP server.
- **L3** `formcraft-app`: Native `eframe` / `egui 0.37` desktop workstation.

Quick Start

```
cargo run -p formcraft-mcp -- status
cargo run -p formcraft-app -- --smoke
```

Product Requirements & Architecture Specification

1. Executive Summary

`formcraft` is the survey management, structured response intake, and customer sentiment analytics engine of the Back-Office Craft Suite. It delivers:

- Local-first SQLite WAL storage for dynamic forms and submission payloads.
- Automated Net Promoter Score (NPS) breakdown across Promoters (9-10), Passives (7-8), and Detractors (0-6).
- Dual-language (German & English) sentiment lexicon scoring for qualitative responses.
- Automated churn risk mitigation by emitting `signal.negative` bus events directly to `gaincraft` for detractors.
- Native `egui 0.37` desktop workstation and stdio JSON-RPC MCP server.

2. Replaces & Cost Savings

- **Replaces:** Typeform (\$59/seat/mo), SurveyMonkey (\$99/seat/mo), Qualtrics CoreXM (\$150+/seat/mo).
- **Cost Reduction:** 100% cloud fee elimination; zero third-party telemetry, air-gapped GDPR compliance for EU enterprise surveys.

3. Architecture

- **`formcraft-store`:** SQLite WAL database schema with tables `forms` and `responses`.
- **`formcraft-core`:** Core dispatch, JSON schema validator, DE/EN sentiment lexicon analyzer, and bus router.
- **`formcraft-mcp`:** Single-binary CLI and stdio JSON-RPC MCP server.
- **`formcraft-app`:** `craft-biz-ui` / `egui 0.37` desktop application with forms manager, response viewer, and NPS analytics dock.

Complete MCP Tool & CLI Verb Reference

FormCraft exposes 11 Model Context Protocol (MCP) tools over stdio JSON-RPC for complete agent automation.

Tool	Parameters	Description
`form_status`	none	Reports database status, forms count, and fleet actor.
`form_define`	`id`, `title`, `description`, `schema`	Creates or updates a form definition and JSON schema.
`form_validate`	`schema`	Validates a form schema definition structure.
`form_list`	none	Lists all defined survey forms.
`form_get`	`id`	Fetches details and schema for a single form.
`form_responses_import`	`form_id`, `responses`	Imports response records with optional ratings and comments.
`form_responses_list`	`form_id`	Lists all responses captured for a specific form.
`form_nps`	`form_id`	Calculates NPS, Promoters, Passives, Detractors, and sentiment.
`form_report`	`form_id`	Comprehensive survey analytics rollup and distribution.
`form_route_detractors`	`form_id`	Emits `signal.negative` bus events for low ratings or sentiment to `gaincraft`.
`form_inbox_drain`	none	Acknowledges and clears pending bus signals in `formcraft`.
